

BEBUSCH HUNGARIA LTD. ENERGY POLICY

BEBUSCH Ltd. is committed to complying with the legal and other requirements of energy management to prevent energy wastage and constantly strives to improve energy performance.

To this end:

- We have designed and operated our energy management system in accordance with MSZ EN ISO 50001: 2012.
- We are constantly monitoring compliance with legal and other regulations related to energy management.
- We monitor and manage the operation of our energy-consuming machines and other equipment, our aim is to improve energy efficiency and energy consumption.
- Our area of significant energy use is the area of product manufacturing, including injection molding machines being the largest energy users.
First of all, we want to maintain or increase our energy efficiency in this area at least compared to the reference period. We review the technology instructions, find the organizational, control and tampering opportunities that we can contribute to our energy performance. We are committed to continually improving our energy efficiency, and in this spirit, we are also considering energy saving factors when designing and implementing new investments and technological developments. We are focusing on energy-efficient products and services.
- Our goal is to use the energy we need for our operation only to the extent necessary.
- We help train our staff to raise their energy awareness.

The management expresses our commitment to our energy policy and we expect it from all our employees.

Zoltán Tokai

General Manager
